

Tips to help conserve water

Regardless of any water restriction in effect, water conservation measures will be promoted by encouraging the following conservation activities including, but not limited to:

- Flushing toilets only as required for solids.
- Not running partial loads in washing or dishwashing machines.
- Restriction of all non-essential maintenance operations that require large volumes of water for recreational swimming pools, or other high water use recreational facilities.
- Refraining from non-essential maintenance operations (those that do not impact public health and safety).

Requests for site and condition specific irrigation scheduling for commercial or industrial operations using a metered irrigation system may be approved in writing by the CAO.

Requests for water conservation exemption permit for newly seeded lawns or freshly planted sod may be applied for at the Municipal Office.
